A strong healthy battery is critical to starting any electric key start lawnmower. A typical mower engine will only create enough energy for the spark plug to fire if the engine cranks over fast enough, around 350rpm min. If your engine sounds like it isn't cranking over at the usual speed, try jump-starting. This will rule out a weak battery.

Riding Lawn Mower Won't Start - Mechanics troubleshooting list

All Bad Boy Mowers have an oil drain (except MZ, MZ Magnum and Diesel model(s)) to make oil changes easier. The drain will be a hose or valve attached to the engine block. To drain your oil, simply open the valve, drain the oil, close the valve and add 10W30 oil back to your gas engine and 15W40 oil for your diesel engine.
