of the car to serve as a ground.

How to Wire a Car Stereo: 15 Steps (with Pictures) - wikiHow

From the amplifier, an amplified audio signal (the solid black line) goes to each speaker in the system — one amplifier powers a subwoofer. The other amplifier powers a set of component speakers in the front of the car (with the signal first passing through the speakers' passive crossovers) and a pair of coaxial speakers in the rear of the car.

Car Audio For Dummies Cheat Sheet - dummies

Attatch your RCA wires to that RCA channel and run that to the input section of your amp; Run your remote wire from a source that has 12v only while the vehicle is running to your amplifiers remote input; run power wire from battery to amp; Run ground wire from proper chassis ground to amp; Run speaker wire from amp to subwoofer
