Taylor

of questions for each chapter solved. I'd appreciate if someone could direct me to where I could find a manual, or something similar.

## **Taylor's Classical Mechanics Solutions : Physics**

Using the Taylor series for  $e^{i\mu t}$ , we have  
$$y(t) = \frac{1}{\omega} \left[ v_0 \sin \mu t + g \left( \frac{1}{\omega^2} (1 - \cos \mu t) + \frac{1}{2} t^2 \right) \right]$$
$$= \frac{1}{\omega} \left[ v_0 \sin \mu t + \frac{g}{\omega^2} (1 - \cos \mu t) + \frac{1}{2} g t^2 \right]$$
$$= \frac{1}{\omega} \left[ v_0 \sin \mu t + \frac{g}{\omega^2} (1 - \cos \mu t) + \frac{1}{2} g t^2 \right]$$

(4) If  $\omega \gg g$ , then the third term is much smaller than the second, and we obtain the desired result.

Taylor's book was the best introduction to Lagrange's and Hamiltonian mechanics. As an example of how meticulous Taylor is in explaining his ideas, I quote the following. "(P251) Actually, it is a bit hard to imagine how to constrain a particle to a single surface so that it can't jump off.
